**IN THE CLAIMS:**

Please cancel claims 18 and 26 without prejudice.

Please amend claims 1, 5, 6, 8, 11-14, 16, 21, 22 and 24 as follows.

*asked*

1. (Amended) A parts ordering system having a first domain, a second domain and a third domain connected in a tree structure, each domain is a unit of processing in a computer system corresponding to a working unit on a production line, wherein said second domain includes:

[expanding] expansion means for expanding, into [its] each component [parts] part, an order that has been received from the first domain; and
